The responsibility for ensuring satisfactory torsional compatibility of the drive system rests with the assembler of the drive and driven equipment. Mill Log Companies will not be held responsible for any torsional incompatibility between drive and driven equipment that has not had a torsional analysis.

The Mill Log Group Quality Statement

"The Mill Log Group of Companies is committed to continuous improvement and customer satisfaction."

The Mill Log Group of Companies has an unwavering commitment to customer satisfaction. We understand that customer satisfaction is the natural result of not only integrity, responsiveness, and professionalism in our collective dealings with customers, but also in delivering the highest possible product and service quality – as measured in truly understanding the needs of our customers and then meeting them with reliable assembly solutions.

Management is also committed to ensuring that the quality policy is understood, implemented and maintained throughout the organization.
